

ITSE 2309 – Introduction to Database

Lab 9 Assignment

Name your file *last_name_Lab10.sql*

Example: Ortigo_Lab9.sql

Include your name, course, and section in your sql file.

Also, number each of the questions in your sql file.

Create each SQL statement in all three dialects. Only use subqueries to complete these statements, NO joins allowed.

1. Write a query to display the product name and the quantity of all the orders in the ordersdetails table that match the same product and quantity as order id 10801. (*Oracle and MySQL only*)
2. Write a query to display the product name and unit price for all the products supplied by the Ma Maison Company.
3. Write a query to display all the employee's first and last name who have had more orders, than Robert King.
4. Write a query to display all the countries that are shipped Sir Rodney's Scones. Sort the list from largest to smallest.
5. Write a query to display all the product names that the Island Trading Company purchased during the summer of 1997.

Upload the single .sql file to Moodle for your assignment submission.
