

ITSW 1307 – Introduction to Database Lab

06 Assignment

Name your file *last_name_Lab06.pdf* Example: Page_Lab06.pdf

Include your name, course, and section in your file.

Create an ERD of your database that you have been using throughout the semester.

Your ERD should contain the following tables:

CATEGORIES, CUSTOMER, CUSTOMERDEMO, CUSTOMERDEMOGRAPHICS,
CUSTOMERS, EMPLOYEES, EMPLOYEE TERRITORIES, ORDER DETAILS,
ORDERS, PRODUCTS, REGION, SHIPPERS, SUPPLIERS, and TERRITORIES

Make sure you draw a box to represent each entity (table) and label it with entity name. Next, list each of the attributes (columns) in the box for that entity. Once you have drawn all your entities, draw the lines to show the relationships (dependency) between each entity.

Your finished product should look similar to the example in your text for the chapter, except it will contain several more entities.

You must use Microsoft Word, Microsoft Visio, Paint Brush, Paint ++, or any other application that will allow you to create a single document that is of one of the following file types: docx, doc, pdf, or jpg. Any other file type will NOT be accepted and will receive a grade of zero.

Upload the single file to Moodle for your assignment submission.
